Delivery	35

1) Performance test measurements/volume. For example 10/3 means 10 measurements of three volumes (10%, 50% and 100% of the pipette's maximum volume).

2) An accredited calibration certificate (per ISO 17025:2005) is provided if ordered.

During a Sartorius service, two-point testing is carried out according to ISO 8655 specifications, unless otherwise stated. Sartorius standard tips are used in Performance testing.

Service Procedure:

- The pipette is opened and carefully cleaned.
- When necessary, worn out parts are replaced.
- Seals and o-rings are lubricated.
- Performance testing (ISO 8655:2002 specifications)

The cost of spares are added separately to the invoice. Every channel in the multichannel pipette is tested individually.

A service and performance test reports are dispatched with the serviced pipette.

Sartorius standard tips are used in performance testing. If the customer uses other brands of tips, they need to be sent in with the pipette.

Pipette performance test is carried out according to ISO 8655:2002 specifications. Sartorius Biohit Liquid Handling Oy's calibration laboratory is a FINAS accredited calibration laboratory no. K041. The Finnish Accreditation Service (FINAS) co-operates with international accreditation organisations, which co-operate to harmonise and promote the consistency of accreditation. FINAS is a member of the European co-operation for Accreditation (EA) and is part of the Multilateral Recognition Agreement (MLA, MRA).
